

## Be Heard... in a Safer Environment

Now the best in classroom audio can help make your school a safer place too. The A+ series from Panasonic includes a security button right on the teacher's microphone. Pressing a button instantly alerts administration that there is an incident. You'll get the proven benefits of classroom audio, from the industry's audio expert – plus a safer environment for students and teachers. **Innovative Classroom Solutions from Panasonic.**

## Benefits

### Classroom Audio

- Provides crystal-clear audio throughout the entire learning space
- Promotes classroom management
- Improves student performance
- Increases student confidence
- Reduces teacher vocal strain and fatigue

### ViewPath

- Allows pre-determined observation (times or periods) to be recorded in the classroom for teacher presentations, etc.
- Classroom emergencies can be recorded at the press of a silent alert button
- Video/audio from the classroom is immediately available for live viewing and is recorded onto a network server
- Recorded instruction, curriculum and training can be uploaded and shared throughout the district from a centralized location on the network
