

VMware View Jumpstart/POC

VMware View is the industry's leading desktop virtualization platform, and the only purpose-built solution for delivering desktops as a secure managed service. Built on the proven power of VMware vSphere, VMware View provides the platform, management tools and rich user experience that organizations need to reduce costs, streamline administration and increase end-user satisfaction. Jumpstart provides an opportunity to learn about the architectural considerations for and benefits of implementing a virtual desktop infrastructure in your environments and the best way to take advantage of all the features and functionality in VMware View.

Jumpstart Includes:

- On-site installation and guided tour of VMware View.
- New PCoIP protocol—allows for best-of-breed desktop performance.
- View Composer—uses linked clone technology to minimize storage requirements
- Storage Optimizations – Tiered Storage, separate user disks, disposable data disks
- Application Distribution – Use ThinApp Provisioning to distribute virtualized applications
- Knowledge transfer of best practices for virtual desktop infrastructure architecture, networking and security.
- Installation and configuration of demonstration environment.

Roles and Responsibilities

- Promedia Engagement Manager: Plans and coordinates all plan and design activities
- Promedia VMware Certified Professional (VCP): Conducts workshops, gathers requirements, conducts design sessions, and develops architectural design

Scope

- Up to 5 days on-site by Promedia
- VMware View Jumpstart to be delivered by a VMware Certified Professional (VCP) consultant from Promedia
- Licenses FREE for 60 days. Promedia server available for 60 days on a "first come, first serve" basis. Alternately, there is an option to purchase a server to run the VMware View Jumpstart to ensure availability at all times.

Technical Details

- Client Connectivity: One (1) LAN-based
- Connection Broker: Single
- vCenter: Single
- Security Server: None
- Transfer Server: None
- Desktop Pools: One (1)
- Client Device: PC (repurposed)
- View Composer: Yes

Application Virtualization

- Mozilla Firefox

Virtual Machine

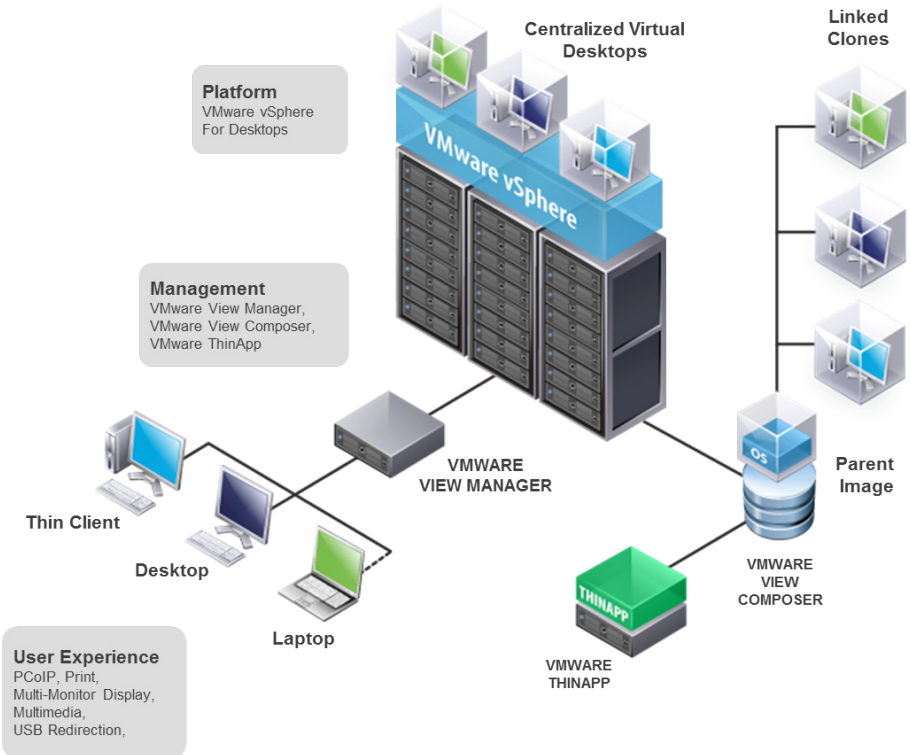

- A standard Promedia 32 bit Windows 7 image is used
- Standard office printers

Promedia's ProTech Professional Services

Promedia, in conjunction with VMware, can provide top of the line consulting, education, and technical account manager services that enable customers to transform IT environments through virtualization. This will allow you to realize greater value from flexible, agile IT service delivery models sooner, with less risk.

Block Hour Support Contract for 40 Hours

Add a 40 hour block hour support contract for Virtualization or other Technical support services. These hours are to be used as reactive support to help in developing you virtualization strategy. *Not to be used for project based engineering.

Related Services

Promedia is able to provide end-to-end services to mitigate the challenges and speed time to production of VMware Desktop Virtualization products among customers of all sizes, across all industries. In addition to the VMware View Jumpstart, you may be interested in these additional services:

- VMware Desktop/Server Virtualization Assessment Services
- VMware View Plan & Design Services
- VMware View Upgrade and Implementation Services
